COIL HEAT EXCHANGERS

CUSTOM IS OUR STANDARD.

Wide range of tube, fin and circuit configurations engineered around your application. Strong **5 mm** and **7 mm** platforms for heat pumps, refrigeration and high-efficiency HVAC systems.

APPLICATIONS

- HEAT PUMP COILS
- REFRIGERATION COILS
- STATIC EVAPORATORS
- WATER COILS
- MARINE COILS
- A/C COILS
- MOBILE A/C & REFRIGERATION

INNER-GROOVED TUBES OPTIONS

R290 & CO_2 APPLICATIONS
Natural refrigerant coil solutions.

CUSTOM CIRCUITING
Designed around your operating conditions.

100% LEAK TESTED
Every coil verified before shipment.

OPTIMIZED PERFORMANCE
Application-specific design for higher efficiency.

ENGINEERING SUPPORT

ATM provides application-specific engineering support backed by thermal capacity and design calculation software. Our engineering team supports customers in coil selection, circuit optimization and performance validation according to the required operating conditions.

Let's engineer your next solution.

COIL TECHNOLOGIES

Custom is our standard.

5 mm & 7 mm platforms • custom circuiting • inner-grooved tube options • 100% leak tested

atm
Coil & Tube Technologies

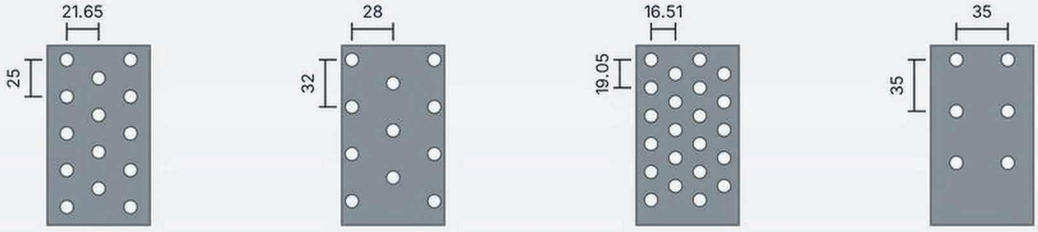

WIDE RANGE OF FIN DIE OPTIONS

Multiple fin geometries and a broad die range.
Custom circuiting. Application-specific engineering.

Finned Block Geometries

Multiple fin patterns and tube matrices to meet a wide range of thermal and application requirements.

TUBE FORMING

From Tube to Complete Assembly.

Tailor-made manufacturing for customer expectations.

Copper tube assemblies and formed tubes for heat pumps, refrigeration, HVAC and industrial OEM applications.
2–54 mm tube forming on CNC bending and forming machines.
All brazed joints are **100% Helium Leak Tested.**

- HEAT PUMPS
- AIR CONDITIONING & HVAC
- REFRIGERATION
- DOMESTIC BOILERS
- HOME APPLIANCES
- INDUSTRIAL OEM

Let's engineer your next solution.

TUBE TECHNOLOGIES

From tube to complete assembly.

Ø2–54 mm tube forming • CNC bending • end forming • automatic brazing • manifolds • complete assemblies

atm
Coil & Tube Technologies

TUBE BENDING TECHNOLOGIES

Precision in Every Bend.

World-class CNC precision. Repeatable in series.

CNC bending and forming at the highest quality — tight tolerances and repeatable results from first prototype to OEM series.

01 · CNC CUTTING & BENDING

02 · END FORMING

03 · AUTOMATIC BRAZING

04 · 100% HELIUM LEAK TEST

Coil & Tube Technologies

LOW MAINTENANCE CONDENSERS

NO COPPER. NO CLOGGING. NO SERVICE.

Low-maintenance condensers with no copper dependency — engineered solutions for commercial refrigeration from 300 W to 5 kW, available with 1, 2 or 3 fan options. The wire-on-tube design helps maintain first-day performance: no clogging, no cleaning service and lower maintenance costs.

100% HELIUM LEAK TESTED

100% FLOW CHECK FOR BLOCKAGE

IMPROVED HEAT TRANSFER
Higher capacity with the same frontal area as battery condensers.

ALWAYS FIRST-DAY PARAMETERS
Gaps between wires are not blocked over time like fins.

ENERGY SAVING
Consumption does not rise as particles collect on the condenser.

LOW GUARANTEE COSTS
No blocked condensers, no failure of working parts.

LOW SERVICING COSTS
No periodic cleaning service — almost no service cost.

LOWER TOTAL COST
Less refrigerant, service and guarantee cost over the product life.

NO COPPER DEPENDENCY | NO CLEANING SERVICE | 30–70% LESS REFRIGERANT | R290 & CO_2 COMPATIBLE

Let's engineer your next solution.

LOW MAINTENANCE CONDENSERS

No copper. No clogging. No service.

Wire-on-tube technology • reduced refrigerant charge • R290 & CO_2 compatible • verified quality

atm
Coil & Tube Technologies

YOUR DESIGN. OUR ENGINEERING.

From initial concept to reliable serial production.

RAPID PROTOTYPING
Fast development loops for new OEM programs.

COLLABORATIVE ENGINEERING
Application engineers work with your design team.

PRODUCT & PROCESS VALIDATION
Testing and process development before serial release.

INDUSTRIALIZATION SUPPORT
Design-for-manufacturing and scalable process setup.

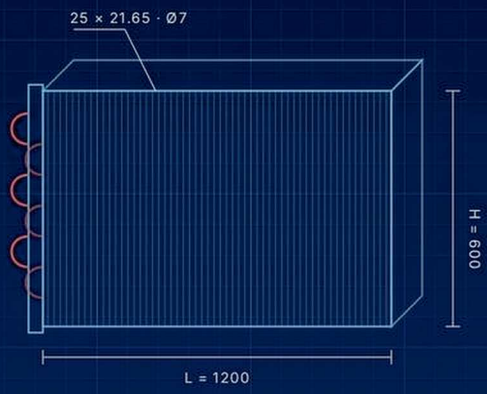

IN-HOUSE TOOLING & FIXTURES
Custom tools & fixtures for repeatable quality and faster industrialization.

SERIAL PRODUCTION
Repeatable quality for long-term OEM programs.

BRING US YOUR APPLICATION.

01 · DESIGN

We draw it.

02 · SIMULATE

POWERED BY UNILAB HEAT TRANSFER SOFTWARE

03 · PRODUCE

Then we build it — in series.
